

Add multiple school licences to an organisation

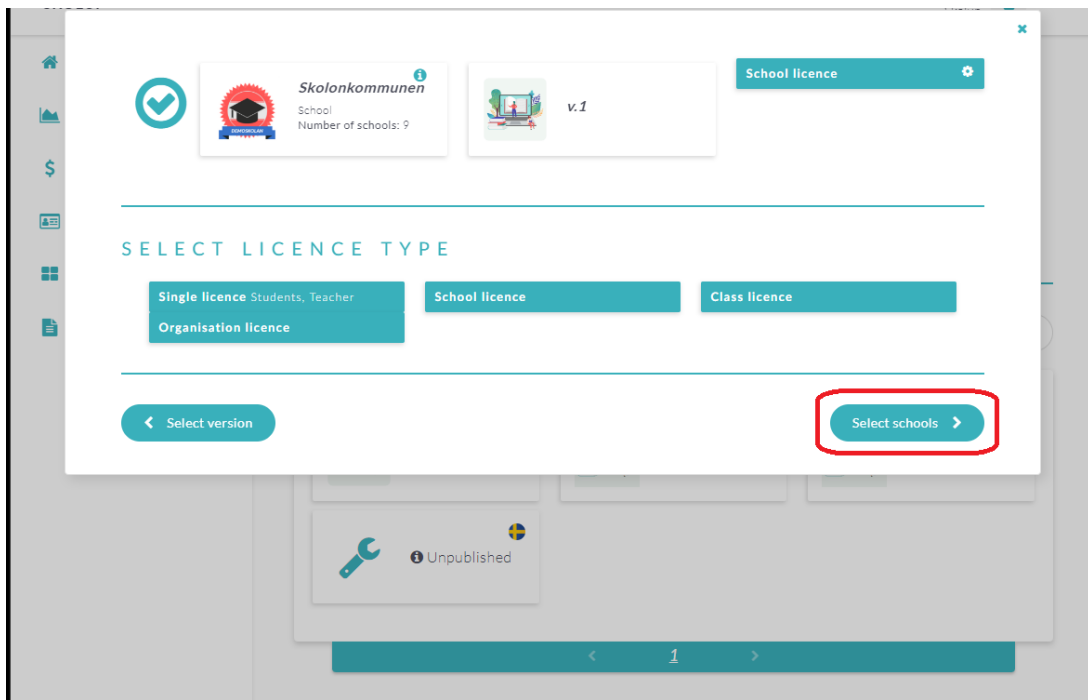

Ulf Kronsell - 2023-05-09 - Create New Order/Licences

To distribute a number of school licences to an organisation, there is a more efficient way than to search for schools one by one.

Search and select Customer organisation, then **Select Tool**.

The screenshot displays the 'SELECT CUSTOMER' interface in the SKOLON system. On the left is a navigation menu with options: Start, Statistics, Economy, Licence management (with a red notification icon), Tools, and Documentation. The main content area is titled 'CREATE ORDER / CUSTOMER / TOOLS' and 'SELECT CUSTOMER'. A search bar contains the text 'Skolonkommunen' and a 'Filter' button. Below the search bar, a message reads 'Select school which will be the customer on the order'. A search result card is shown with a school logo, the text 'Skolonkommunen', 'School', and 'Number of schools: 9'. A teal bar with the number '1' and navigation arrows is positioned below the search results. At the bottom of the interface, a teal button labeled 'Select tool' is highlighted with a red rounded rectangle.

Click the **School licence** and then click **Select schools**.

Click the schools you want to distribute licences to. Click **Done**.
