<ul> <li>Tools</li> <li>Documentation</li> </ul>	Name tool package My new tool package	or Svenska			Primary language
		or svenska			Primary language
	My new tool package	or svenska			Primary language

To add a new language , click **New language**.

4. Click the **Products** tab. Select license type, renewal type, license duration, market and delivery channel. Products that are possible to incorporate in the package is listed. **NOTE!** There can only be one license-, and renewal type in a package. All tools also have the same license duration and delivery channel.

Click the checkboxes for the desired tools and click **Add**. Choose the number of licenses per product, then click **Save**. **NOTE!** Make sure that all tools you want to include in the package are published.

**NOTE!** If you make changes to a product of a tool that is a part of a tool package, you will get information that this product is a part of a tool package and that the package may need to be adjusted. The package is unpublished until the adjustment has been made.

5. Click the **Sales** tab. Fill out price and VAT. Click **Save**. **NOTE!** A tool package cannot have price on request and also note that it's not possible to assign a discount to a tool

package.
